

# SinglePort Documentation

**Thank you for purchasing the SinglePort Portfolio Theme.**

SinglePort is a simple and minimalistic theme using the Bootstrap 3 framework for it's build.

To find out more about the bootstrap components and javascript you can add simply visit:

<http://getbootstrap.com/javascript/>  
<http://getbootstrap.com/components/>

To use additional icons visit the following link:

<http://fortawesome.github.io/Font-Awesome/icons/>

You can then add an icon easily by using the shortcode. For example for the lock icon you would use

```
<i class="fa fa-lock"></i>
```

## **Editing Styles**

To edit the styling or colors of the template simply go to the CSS folder and edit the portfolio.css file.

## **Hide the Home Icon Link**

To hide the home link in the navigation bar simply change the following code in the index.html file:

```
<li class="page-scroll">  
  <a href="#page-top">Home</a>  
</li>
```

to

```
<li class="hidden">  
  <a href="#page-top"></a>  
</li>
```

---

## **Further Support**

Please feel free to contact [themes@powdesign.co.uk](mailto:themes@powdesign.co.uk) if you require further support. Please note free support does not cover any customisation requests or scaffolding requests. Additional help on columns and grid layouts can be found at <http://getbootstrap.com>.

---

## **License**

On purchase of this theme you are bound by the license terms as outlined in <http://gridgum.com/licenses/> dependent on your theme purchase.
